

Strange

Kit Summary:

Kit #	B2794
Description	2 piece carbon steel or stainless steel rotor
Applications	Strange brake kits
Page	1 of 1 total pages
Date Modified	Jan 27, 2015

PART#	DESCRIPTION
B2794A	carbon steel brake rotor
B2794AS	stainless brake rotor
B2794C	spirolox retainer (03/2013 and older external style)
B2794D	spirolox retainer (04/2013 and newer internal style)

STAINLESS STEEL ROTOR ADVANTAGES (UPGRADE)

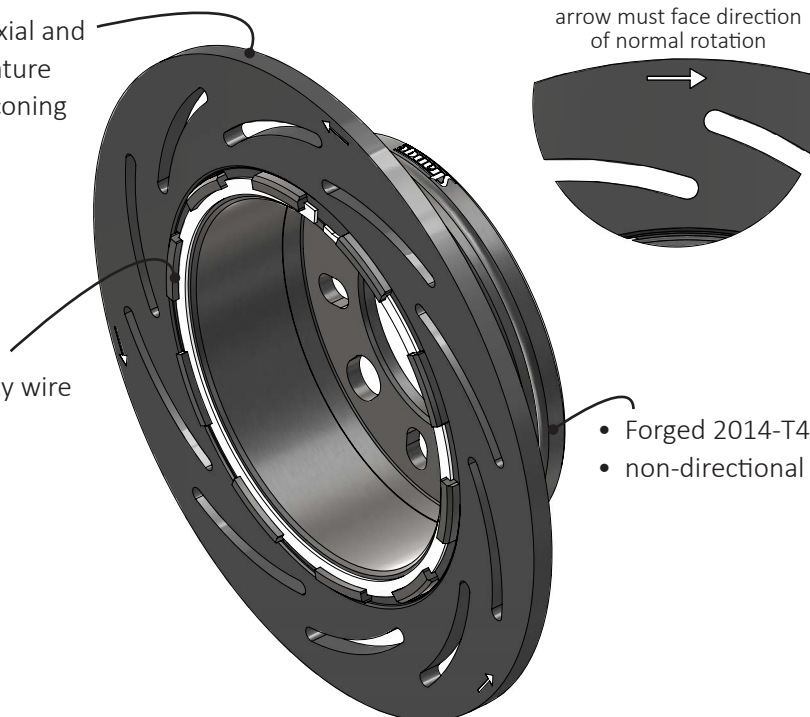

- heat and corrosion resistant 410 stainless steel
- survives elevated temperatures associated with high speed braking events without warping or distorting
- superior strength at high temperatures compared to carbon steel
- thermally stress relieved to further enhance stability
- compatible with all Strange brake pad compounds

TECH INFO

11.25" outside diameter brake rotor
 0.355" thick rotor
 0.250" thick brake rotor hat
 3.250" pilot inside diameter (*in hat*)
 accepts axle flange outside diameter 6.245 or smaller
 4.50" & 5" uni-lug bolt circle accommodates 1/2" or 5/8" studs
 assembled 2 piece rotor weighs 6.50 lbs vs. traditional 7.20 lbs 1 piece rotor

- Steel brake rotor
- Floating rotor design allows for axial and radial growth of rotor as temperature increases reducing warping and coning tendencies

- Internal spirolox retainer
- No bolts to come loose or safety wire
- Unisex rotor design

- Forged 2014-T4 aluminum hat
- non-directional
